Welton Enterprises, Inc.

Company History

Founded in 1987 by Kenneth R. Welton and Kurtis D. Welton (left), Welton Enterprises began as a one-stop shop crossing all sectors of the real estate development industry. With projects ranging from the High Point Estates Residential Plat to the High Point Office Park to the West Metro Business Park, Welton has developed properties across all categories of real estate. Welton steadily grew its portfolio through the 1990s, and while continuing

this growth, transitioned in the first part of the 2000s honing its business model to focus on industrial real estate and Class A office development. With a continual responsiveness to market conditions and returns, Welton again transitioned in 2012 to diversify the portfolio by adding a focus on new high quality multi-family and mixed use development while continuing to hold and manage a core portfolio of industrial assets.

The Business Model

Welton's business model includes: developing turnkey business parks, developing single and multi-tenant industrial or office buildings in prime locations, acquiring properties and developing or investing in new high quality multi-family and mixed use developments

in irreplaceable locations. The model is based on long-term, sustainable growth and when the company undertakes a project the intent is to hold, manage and lease the property(s) on a long-term basis providing a stable atmosphere for its existing and future tenants.

“We develop and manage our properties so that many generations from now, our properties will still have a positive impact on the community.”

Kurtis D. Welton, President & Treasurer

Under the leadership of its founders, every aspect of the company’s operations has reflected a commitment to objectivity, creativity, and sound business ethics. Welton has and continues to be a go-to resource for local, regional, national and international companies that are looking for build-to-suit development and/or an existing property in the greater Madison market.

Core Services

Welton offers the full spectrum of services when it comes to real estate development, management and brokerage. Whether you need someone to complete a complex build-to-suit or a company to help you find a new space for your business, Welton Enterprises can help.

Leasing of Existing Properties: Welton manages and leases all of the company owned assets and typically has available industrial and office spaces ranging from under 5,000 sq. ft. to over 100,000 sq. ft. These well-maintained, prime locations offer easy access and visibility, with build-out options providing flexibility to expand.

Build-to-Suit Projects: When it comes to build-to-suit projects, Welton has been the go-to resource for many of Madison's most prominent companies. Welton's experienced development team offers site selection services; development consulting; turnkey development; design-build management; design, construction, and asset management; and due diligence.

Joint Venture: Welton offers its clients the ability to be a part owner in the facility that is leased by that client. Welton's extensive market research and knowledge reduces the risk involved in owning commercial real estate while giving the client the ability to grow real estate equity and long-term value for their investments. Welton's professional property management handles the real estate issues allowing the client to focus on their own business.

Sale/Leaseback: Under the company's Sale/Leaseback program, Welton buys the client's facility to own, manage and leaseback to the client. The long-term leaseback allows the client continued use of the facility while enhancing its working capital and converting non-liquid assets into cash—and, with Welton handling real estate issues, their employees can focus on their core jobs.

Third Party Brokerage: If your company is looking to lease a new space or purchase a new facility you can rely on the experience at Welton to help get the transaction done. With an in-depth knowledge of both the owner/landlord side and the buyer/tenant side, Welton can help you through the process of a new lease or purchase. We use our win-win philosophy to craft a deal that will work for both sides of the transaction ensuring that everyone's expectations are met.

Investment Options: Welton is strategically positioned for substantial growth over the next 10 years and beyond. With over \$100,000,000 of projects on the drawing board Welton will be offering opportunities to investors to be a part of these projects. Leveraging a long history and local market expertise, Welton can offer investors opportunities in well located developments with long-term value.

Madison Wisconsin Region

“Everything here starts with quality of life,” says Paul Jadin, president of the Madison Region Economic Partnership (MadREP). The region, which includes Wisconsin’s state capital, ranks at the top in the nation for places to live and raise a family, thanks to high-quality schools, leading health-care facilities, diverse arts and culture, and abundant recreation. Along with drawing

national notice as a destination for music lovers, foodies and young professionals, the region is building on its amenities with initiatives to make its cities greener, better connected and more livable. “CEOs are making decisions on where to move their companies based on where they want to live, and so are employees,” he says. “We want to make sure we are attracting both groups.”

More than 75 percent of the region’s residents over age 25 have at least some college education, more than 30 percent hold a bachelor’s degree, and more than 20 percent hold an advanced degree.

Madison: #2, Top Markets with Strongest Brainpower ■ *Business Journals, 2014*

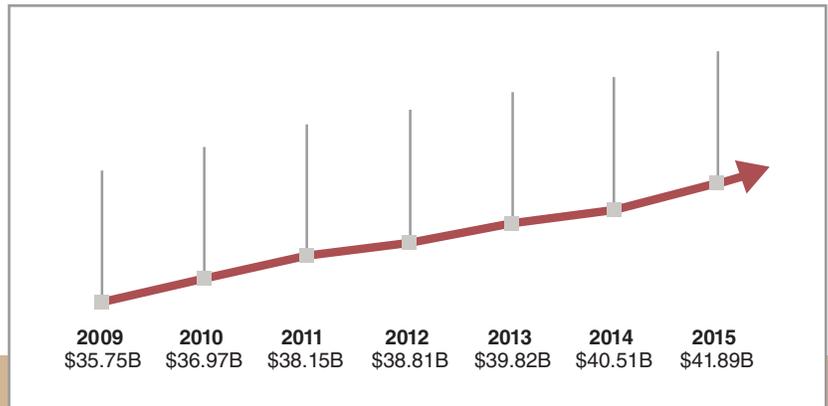

Madison: #5, City Winning the Battle for Information Jobs ■ *Forbes, 2014*

Madison is home to the flagship campus of the University of Wisconsin and its more than 40,000 undergraduate and graduate students from more than 120 countries. UW-Madison awards close to 10,000 degrees each year and ranked eighth in the nation in 2013 for the number of doctoral degrees awarded, according to the National Science Foundation. It's no wonder bizjournals.com in 2014 ranked Madison No. 2 for metros with the highest levels of "collective brainpower."

Madison Region Real Gross Domestic Product (GDP)

Real GDP is an economic indicator providing an overall picture of the economy and its performance. It is a measure of the value of economic output produced by an economic system, adjusted for inflation and price changes. While GDP indicates an economy's size, GDP per capita correlates with worker productivity and living standards, and GDP growth can serve as an indicator of economic growth.
